

Prebona OdorControl™

Instructions

Remove Odors in Cars

This instruction provides an overview of how to remove odors in cars with Prebona OdorControl.

Before treating a car against bad odor, make sure the car interior is clean and dry. Treatment with Prebona OdorControl takes about 90 seconds and will remove unwanted odors from e.g. smoke, urine and animals. The odor eliminating effect of Prebona OdorControl is almost immediate, i.e. the odor is eliminated within minutes, and typically lasts for a few days up to several weeks depending on conditions. Sometimes it is necessary to repeat treatment for best result. Odors are typically absorbed in textiles and treatment should therefore be focused on textile surfaces. For more information on what odors are eliminated and expected effect, visit www.prebona.com. Re-apply Prebona OdorControl regularly to maintain an odor-free car.

When applying Prebona OdorControl with a spray bottle, use a fine mist and aim at textile surfaces inside the car, e.g. floor, roof and textile seats. Avoid spraying on hard surfaces and leather, e.g. dashboard, glass and leather seats, as Prebona OdorControl may leave white marks that can be difficult to remove if let to dry. If Prebona OdorControl is applied to an unwanted surface, wipe off immediately with a moist cloth before drying. If Prebona OdorControl is let to dry on a non-absorbing surface and marks are visible, use an appropriate detergent, depending on surface, to remove the white marks.

When applying OdorControl, the temperature should be above +40°F. Before use, read safety data sheet, available at www.prebona.com, and use safety gear according to instructions. Avoid breathing spray mist.

3 easy steps to remove odors with Prebona OdorControl:

1. Make sure the car interior is clean and dry.
2. Apply Prebona OdorControl with a spray bottle on textile surfaces. Spray until textile is moist but not wet, typically 3 to 5 sprays per surface. Wipe off leather and hard surfaces.
3. Wipe off hard surfaces and let dry – the car is clean and the odor is gone! Repeat if necessary.
